

It's timeless design and high standard of security makes the Simpel USB Flash Drive one of our most popular products. The USB port is protected by a cap and saved data is additionally safeguarded by an aluminium alloy surface and a high quality shock proof plastic exterior. A keyring assists in the transport and storage of the USB memory stick. The exterior rim is available in five different colours and on request other colours are also possible. Additionally both sides of the memory stick can be printed or engraved with your own logo. A green LED light flashes when data is being read or transferred on to the stick.

enhancement option:

Laser engraving

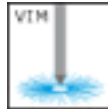

Offset printing

Pad printing

DE laser engraving
